

Development Engineer (m/f/d) ADAS / AD Systems - System Responsibility

📍 Chemnitz, Munich, and Weyhausen

Level of experience: Experienced

Your purpose

System responsibility in the development of automated / autonomous vehicle systems

Tasks you will take on

- You are the central contact for architectural design, specification of requirements and parameters, test concept, defect management and documentation
- You take over the technical leadership of project staff
- You are the central contact for coordination to the system with the customer, interface partners and component suppliers
- You are responsible for scheduling the implementation of system modules in the affected components
- You undertake communication and (de)-escalation in the event of deviations from deadlines and project goals at customer side
- You undertake the planning of the overall system test and validation
- You coordinate the analysis and troubleshooting
- You are the contact person for the degree of maturity of the entire system

Your qualifications include

- Successfully completed studies in electrical engineering, computer science, industrial engineering or similar
- Strong professional experience as a developer, project manager or technical project manager
- Distinctive technology and process knowledge from automotive industry (system development and series development)
- Detailed knowledge of project management, especially agile project management methods and tools
- Experience with model-based development environments (e.g. rapid prototyping) is desirable
- Business fluent in German and English (Due to the requirements, we cannot consider a German level below B2)

Your skills include

- High technical and technical leadership qualities
- Analytical and conceptual thinking
- Through "thinking beyond the borders"
- Strong team and communication skills
- High level of personal responsibility and initiative
